

AI-12CRL- MINI FLASHLIGHT KEYCHAIN

\$4.00

Product Images

Description

This is the best mini crank key-chain with two ultra bright LED's. The Eco-friendly crank lights do not require batteries just wind-up power! Just a few turns on the winder and you will find illumination! Can be individually boxed and has an on/off switch. Remember, there's no need to worry about running out of batteries or buying batteries all together. It's a great tool to have in the glove compartment of your car, just in case of emergencies or just around the house. The power of light is just a wind away. YOU can create power in your hands! If everyone used crank powered flashlights we would avoid millions of harmful batteries to landfills each year. In large quantities, universal waste may be harmful to the environment and therefore shall be managed as hazardous waste after arrival at a destination facility (i.e., landfill, transfer station). Wastes known as universal wastes include batteries. This Eco-friendly crank light does not require batteries. 1 1/8" x 1 1/2"
