Description

Developed and produced on Canadian soil, Faro's Dig print process is a two time PPC award winner for its innovative design. This spectacular 4 color process brings your custom metal designs to life. From lapel pins to medallions, our Dig print process can be applied to a range of surfaces, giving you the freedom to print your full color design on any size custom metal product. With the ability to print on 2D raised and recessed or one-sided 3D modeled pieces, there is no limit to what we. Complies with Prop 65. 1.375" Diameter
